

ASANKA WIJESOORIYA

AI/ML Engineer | Generative AI · RAG · LLM Agent Systems

Colombo, Sri Lanka | +94 76 450 1405 | ramwijesooriya@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI/ML Engineer who builds and ships Generative AI systems end to end - from RAG pipelines and multi-agent LLM orchestration to containerized deployment on AWS. Strong in Python, FastAPI, LangChain, and LangGraph, backed by full-stack delivery in Next.js and React. Proven at turning LLM prototypes into deployed, billable products with clean REST APIs and reproducible Docker builds.

TECHNICAL SKILLS

Generative AI & LLM: RAG, LLM Orchestration, Multi-Agent Systems, AI Agents, Prompt Engineering, LangChain, LangGraph, Google Gemini, Groq, Semantic Search, Embeddings

Machine Learning: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, OpenCV, Facebook Prophet

Languages: Python (Advanced), SQL, TypeScript, JavaScript, C++

Vector & Data: Pinecone, Qdrant, ChromaDB, Redis, PostgreSQL, Supabase, MongoDB, Pandas, NumPy

Backend & APIs: FastAPI, Flask, REST APIs, Microservices, Next.js, React.js

MLOps & Cloud: Docker, AWS (EC2), GitHub Actions, CI/CD, Nginx, Git

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern - CodeLink International Aug 2025 - Jan 2026

Malabe, Sri Lanka

Contributed to the development and enhancement of software and AI/ML solutions as part of an engineering team. Assisted with implementing, testing, debugging, and integrating application features across development workflows. Worked with software development tools, APIs, databases, and version-control workflows to support application development. Collaborated with team members to analyze technical requirements, troubleshoot issues, and deliver reliable software solutions. Gained practical industry experience in software engineering, AI/ML development, teamwork, and professional development practices.

KEY PROJECTS

TripMate AI - Multi-Agent AI Travel Planner (Groq · LangGraph · FastAPI · PostgreSQL)

[Live Demo](#) · [Code](#)

- Architected a multi-agent travel-planning system orchestrated with LangGraph, coordinating specialized agents that convert natural-language trip requests into complete, structured itineraries.
- Integrated Groq for low-latency LLM inference behind a FastAPI backend, with PostgreSQL persisting trip and application state.
- Deployed the full system as a live, publicly accessible web service on Render - an end-to-end AI product spanning agent orchestration, API design, and production hosting.

AI ResearchPro - Generative AI SaaS Research Platform (Next.js · FastAPI · Google Gemini · Tavily · Lemon Squeezy)

[Live Demo](#) · [Code](#)

- Architected an end-to-end Retrieval-Augmented Generation (RAG) pipeline combining Google Gemini with Tavily live-web retrieval to deliver grounded, citation-backed research answers.
- Developed a full-stack SaaS platform on Next.js and Python FastAPI, exposing clean REST endpoints that served automated research workflows to end users.
- Integrated Lemon Squeezy subscription billing to monetize the product, automating the full sign-up-to-payment lifecycle across multiple pricing tiers.

Smart Shop AI Agent - Autonomous E-commerce Assistant (LangChain · Gemini 2.0 Flash · Pinecone · Redis · Docker)

- Built an autonomous multi-tool AI shopping agent with LangChain and Gemini 2.0 Flash, routing user queries between structured inventory lookups and semantic policy search over a Pinecone vector store.
- Optimized backend cost and latency with Redis token-bucket rate limiting and response caching, cutting redundant LLM calls and stabilizing latency under concurrent load.
- Containerized the full agent stack with Docker, producing reproducible builds and one-command deployment that eliminated environment drift across dev and production.

House Price Predictor - End-to-End MLOps Platform (Python · Flask · React · Docker · AWS EC2 · GitHub Actions)

- Deployed a production full-stack ML application (React + Flask via Nginx) returning real-time property valuations from a trained regression model.
- Orchestrated a fully automated CI/CD pipeline with GitHub Actions and Watchtower on AWS EC2, achieving zero-downtime continuous deployment on every push to main.

Sales Forecasting AI - Time-Series Analytics Platform (Python · Flask · Facebook Prophet · Pandas)

- Developed a time-series forecasting web app powered by Facebook Prophet, generating custom date-range sales predictions and serving serialized models (.pkl) with interactive forecast visualizations on demand.

EDUCATION

B.Sc. (Hons) in Software Engineering (2022-2026) - Finished

Sabaragamuwa University of Sri Lanka - Belihuloya, Sri Lanka

Relevant coursework: Machine Learning, Artificial Intelligence, Data Structures & Algorithms, OOP, Databases, Computer Networks.

CERTIFICATIONS

Generative AI: Prompt Engineering Basics · DevOps: Beginners to Advanced · Full-Stack Web Development Bootcamp (Udemy)

LEADERSHIP & ACTIVITIES

- Technical Team Member, IEEE Student Branch, Sabaragamuwa University (2023 - Present) - ran workshops and hackathons.
- Industry field visits to WSO2 and Creative Software - enterprise software and cloud engineering exposure.
